

Does your daughter have technology questions?
Do you wish you had someone who could help any time?

Just ask AL!

AL is your daughter's new technology tutor, and
it's available 24 hours a day, 7 days a week.

AL stands for **Atomic Learning**, our online resource for software training. AL is available to our students in **grades 4-12** and their families in school **and** at home throughout the 2007-08 school year.

Atomic Learning's innovative approach to software training focuses on answering common questions encountered when learning and using software. How do you cut and paste in Word? How do you add animation to a PowerPoint slide? How do you crop a photo in Photoshop Elements? Just ask AL.

1. Go to **www.atomiclearning.com**
2. Enter HB's user name and password. Your daughter should have brought this information home or you can contact your child's computer technology teacher for this information.

(As part of our licensing agreement, we ask that you not share this username and password with anyone outside the HB community.)

Type your question in the search box and click on **Go!**

3. An answer will be provided in the form of a one to three-minute tutorial movie. The movie will walk you and your child through all the steps needed to complete the task.

Hathaway Brown School is dedicated to providing the highest quality technology resources available in order to prepare our students for their futures. That is why we are making Atomic Learning available to you—we want you to have the resources to help your daughter with school work. And while you're at it, you can use Atomic Learning to learn about software applications that interest you!

If you have questions, please contact your child's computer technology teacher at Hathaway Brown School.
